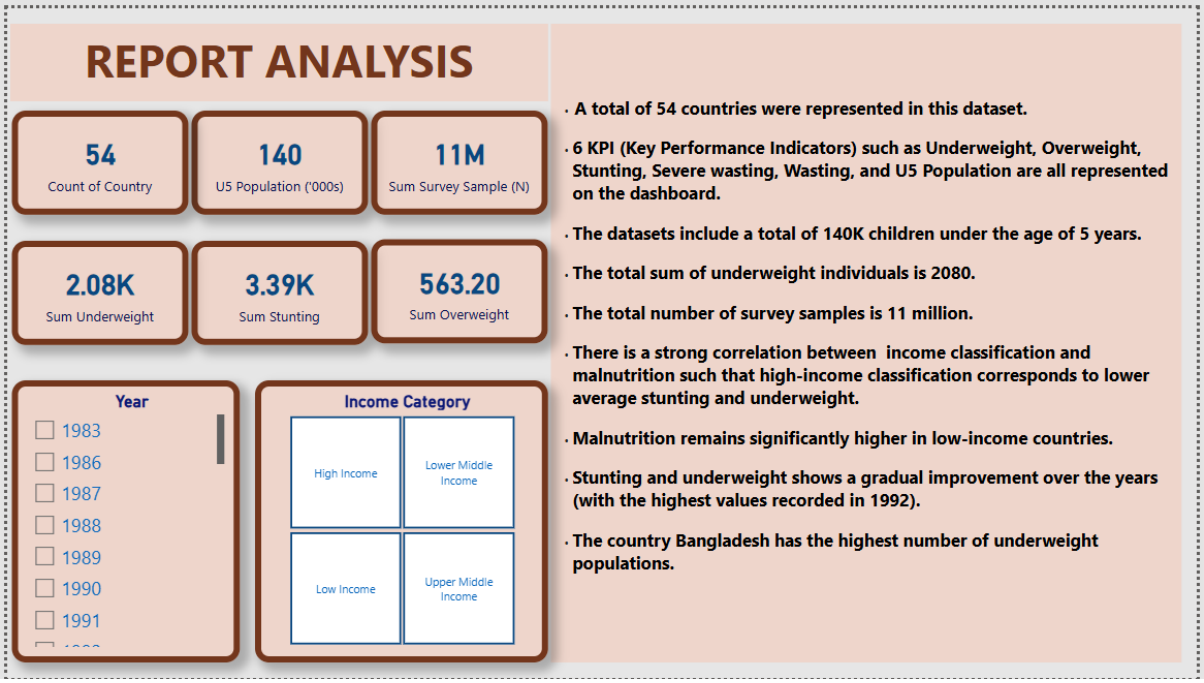
Report

Date	25 June 2025
Team ID	NA
Project Name	Global Malnutrition Analysis (1983-2018)
Maximum Marks	5 Marks



KEY INSIGHTS:

1. A total of 54 countries were represented in this dataset.
2. 6 KPI (Key Performance Indicators) such as Underweight, Overweight, Stunting, Severe wasting, Wasting, and U5 Populations are all represented on the dashboard.
3. The datasets include a total of 140K children under the age of 5 years.
4. The total sum of underweight individuals is 2080.
5. The total number of survey samples is 11 million.
6. There is a strong correlation between income classification and malnutrition such that high-income classification corresponds to lower average stunting and underweight.
7. Malnutrition remains significantly higher in low-income countries.
8. Stunting and underweight shows a gradual improvement (with the highest values rrecorded in 1992).
9. The country Bangladesh has the highest number of underweight populations.
