

Dashboard Design

Date	25 June 2025
Team ID	NA
Project Name	Global Malnutrition Analysis (1983-2018)
Maximum Marks	5 Marks

Outcomes from the Dashboard:

1. A total of 54 countries were represented in this dataset.
2. 6 KPI (Key Performance Indicators) such as Underweight, Overweight, Stunting, Severe wasting, Wasting, and U5 Population were all represented on the dashboard.
3. The datasets include a total of 140K children under the age of 5 years.
4. The total sum of underweight individuals is 2080.
5. The total number of survey samples is 11 million.
6. The stacked column chart shows that high income classification corresponds to lower average stunting and underweight.

7. The line chart shows that the country Bangladesh has the highest number of underweight populations.
8. The Area chart shows the trend of the malnutrition indicators over the years, stunting and underweight shows a gradual improvement (but 1992 recorded the highest values)
9. The doughnut chart shows the sample distribution by the income category with the upper middle-income class recording the highest and the low-income class the lowest.
